

# T-48 Thin Overlay

- A Two-Component, Polysulfide Epoxy-Based Material System
- Designed as a Wearing Surface on Bridge Decks and Other Pavements
- Prevents Ingress of Moisture, Chlorides, Salts and Corrosive Substances
- Adds Less than 4 - 4.5 of Dead Load per Square Foot of Deck Area

# T-48 Thin Overlay

## *Features & Advantages:*

- FRP, Steel, Concrete and Wood Compatible
- High Flexibility
- Skid Resistant
- Water, Salt and Chemical Resistant
- UV Resistant
- Strong Bond
- High Early Strength
