## AIRFIELD PAVEMENT MARKINGS

### Airfield Safety

Pavement markings play a critical role in ensuring safe and efficient airfield operations. To provide effective visual guidance and clearly defined boundaries, markings must maintain high visibility, brightness, and durability under varying environmental conditions and temperatures.

### Durable, High-Definition Markings

Transpo Color-Safe® is one of the most durable and high-definition airfield marking solutions available. Manufactured using an advanced methyl methacrylate (MMA) resin system, Color-Safe offers exceptional longevity, superior color retention, and strong adhesion to both asphalt and concrete surfaces. With a rapid curing time of as little as 30 minutes, Color-Safe minimizes operational disruptions, allowing airfields to quickly resume normal activities.

Color-Safe vs. Thermoplastic vs. Paint

	Color-Safe	Thermo	Paint
ADHESION TO CONCRETE	EXCELLENT	POOR	POOR
REFRESH OR REMOVAL	REFRESH	FULL REMOVAL	REFRESH
UV STABLE	YES	NO	NO
CURE TIME	30 MINUTES, MINIMUM	WAIT FOR COOLING	WAIT FOR DRYING
ADHESION TO SELF	YES	NO	YES
SPECIALIZED EQUIPMENT NEED	NO	YES	NO

Color-Safe is compliant with Advisory Circular: Standards for specifying construction at airports, Item P-620 Runway and Taxiway Markings.

SAFER TRANSPORTATION THROUGH INNOVATION

# Color-Safe®

## AIRFIELD PAVEMENT MARKINGS

### Features and Advantages

- Easy to apply/no special equipment or heat is required for installation.
- Cures in a wide application temperature range (40°-100°F).
- Fast cure, open for use in as little as 30 minutes.
- Enhanced visibility option with the addition of glass beads or skid resistance aggregate.

### Airfield Applications

- Taxiway and Runway Markings.

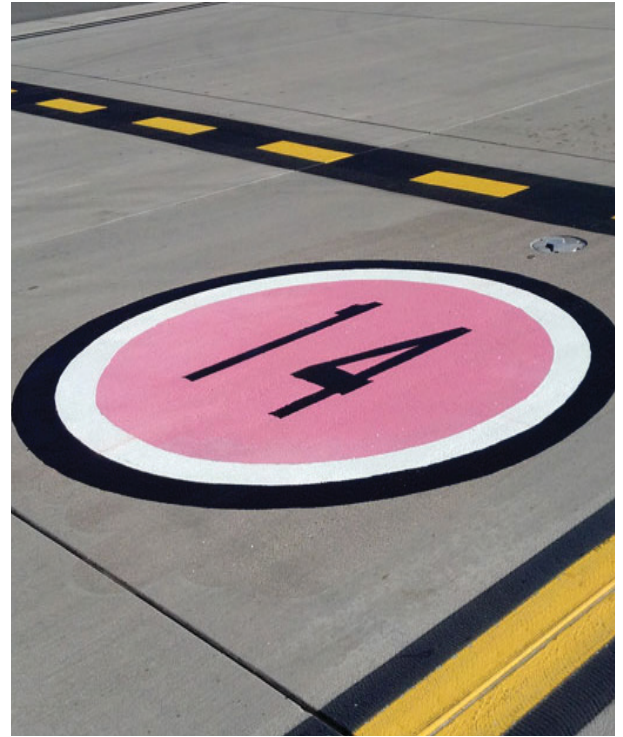

### Landside Applications

- Pavement Wayfinding Markings.
- Landside Pedestrian Areas and Crosswalks.

### Standard and Custom Colors

Color-Safe has standard color options as well as custom colors widely used for airfield and landside applications.

Color-Safe is available in White, Red, Orange, Yellow, Black, and Pink. You can enhance the conspicuity of the markings by adding retro-reflective glass beads to the Color-Safe surface.

Color-Safe MMA conforms to FAA regulations for taxiway and runway markings:  
AC 150/5370-10H – Standards for Specifying Construction of Airport.
